

Product Overview:

Automatic Additive Injection System

Injecting additive into your system can be a hassle. Let us make it easy for you!

Features as shown:

Our easy, emission-free, automatic additive injector helps you add products such as methanol, Pro200, Vapo-Kleen or CGX4 into your system. Our injector is made with quality products such as:

- Hydra-Cell additive pump with a 1 HP explosion-proof motor capable of up to 3 gpm
- GPI G2 Digital flow meter powered with lithium batteries for service up to 9,000 hours
- Hydra-Cell C46 pressure regulating valve
- Explosion-proof start/stop switch
- 6' pump inlet and bypass hose
- 10' pump outlet hose
- Liquid-filled pressure gauges

Keeping operation simple:

- Pump can be connected to a 55 gallon drum of additive that is in a horizontal position
- Pump outlet can connect to either the liquid or vapor piping
- Meter automatically turns on when the flow starts
- Turn on the pump and inject the desired amount of additive; turn off the pump

Want to know more? Give us a call. Manually pouring additive is a thing of the past. We have the solution!
